Precipitation probability					
90%	50%	70%	70%	70%	40%

Forecast for Tuesday 01 Nov 2022

Weather: An area of persistent, occasionally heavy rain moves quickly eastwards during the early morning. This clearing to a somewhat drier and brighter interlude mid-morning and perhaps some sunshine, but a few sharp showers will linger. Becoming cloudier again in the afternoon with longer spells of showery rain developing, some of this will be heavy and could also be thundery. Fewer showers in evening with some clear spells developing. Windy throughout the day, especially on summits during the morning and late evening.

Chance of cloud-free hill tops above 600m: 40% becoming around 60% from mid-morning into the afternoon and again late evening.

Low cloud and visibility: Scattered cloud at 400m through the day, but perhaps more extensive in showery rain, with broken or extensive cloud between 500 and 700m, though likely more scattered for a time from mid-morning. Good visibility out of rain, but murky periods with rain as lower cloud merges with main cloud layers at times and falling poor in heavier outbreaks of rain beneath cloud.

Meteorologist's View

Rather wet and murky at times, especially on mid-level and upper slopes through the afternoon with very wet conditions underfoot and some navigational difficulties.

Recent rainfall: measured at Neuadd: altitude 353m

Recorded at	Last 24 hours:	Last 48 hours:	Last 72 hours:
03:00 on Tue 01 Nov 2022	17.8mm	25.4mm	32.4mm

Forecast for Wednesday 02 Nov 2022

Weather: A mostly dry, bright start, but heavy, showery rain soon spreading from west. More prolonged heavy rain through the late afternoon and gales or severe gales bringing challenging conditions. Rain clearing by early evening.

Maximum wind: SW 30-35mph at first, but increasing 35-45mph gust 50-55 mph by the afternoon, though 55 gust 70mph is possible on summits. Decreasing a little very late afternoon then turning more westerly and decreasing 30 gust 40mph in evening.

Chance of cloud-free hill tops 600m: 80%, but lowering to 30% in afternoon rain.

Low cloud and visibility: Mainly scattered cloud above 800m at first, but soon extensive cloud down to 600m in showery rain and then lowering to 400m at times. Mainly good visibility at first, but becoming poor sometimes very poor in rain.

Temperature: **Valleys:** Plus 6 C rising to plus 10 C
At 600m: Plus 5 C
Freezing level: Above the tops
